Examiner's Statement of Reasons for Allowance

1. This office action is in response to an amendment filed on May 26, 2005. Previous office action contained claims 1-6, 9-13, and 25-28. Applicant amended six claims (1, 5, 9, 12, 25, and 27) and cancelled two claims (4 and 11). Moreover, the applicant added claim 29. Amendment filed on May 26, 2005 have been entered and made of record.
2. Claims 1-3, 5, 6, 9, 10, 12, 13, and 25-29 are allowed.
3. Claims include limitations that the prior art of record does not appear to teach or render obvious the claimed limitations as recited below.
4. The following is an examiner's statement of reasons for allowance:

Walker U.S. Patent 6,321,269 teaches a method for communicating data between computers by determining the amount of data to be received, monitoring and detecting when the remaining amount of data to be received is less than a predetermined amount; and sending a preemptive acknowledgement in response to detection and prompting computer to transmit the remaining data to be sent. However, the prior art of record fails to teach or suggest individually or in combination as stated in claims 1, 9, 25, and 27, "comparing an acknowledgment number received from the external transmission control protocol device to an aggregate size of the content, if the acknowledgment number is one of greater than and equal to the aggregate size of the content, then refrains from sending another content segment; otherwise, keep sending another content segment", and in combination with other limitations as set forth in the independent claims. Claims 2, 3, 5, 6, 10, 12, 13, 26, 28, and 29 are allowed due to dependent claims.
